

Is your
skin red
around your
forehead,
cheeks, chin
and **nose?**

The person(s) depicted are model(s) used only for illustrative purposes.

Do you also get
red bumps
similar to acne
on your face?

If so, please contact us to learn more about our research study of an investigational medication for adults with papulopustular rosacea.

Papulopustular rosacea is a type of rosacea marked by facial redness and acne-like bumps.

To qualify, you must:

- Be 18 years of age or older
- Have moderate to severe papulopustular rosacea
- Have a minimum of 15 papules or pustules on your face (acne-like red bumps)

Qualified participants will receive study-related evaluations and study medication at no cost, and may receive compensation for their time and travel.
